

SAFETY DATA SHEET

Feeding the Future Sulfate Plus, Granular, 20-0-0 Ammonium Sulfate

Section 1. Identification

Product identifier

: Sulfate Plus, Granular, 20-0-0 Ammonium Sulfate

Other means of identification

Synonyms: Granular Ammonium sulfate

Product code(s): 503-4408; 504-4408; 1996-135

Historic MSDS #: 00135

Product type : Solid.

Relevant identified uses of the substance or mixture and uses advised against

Identified uses

Fertilizer. Manufacture of chemicals. Manufacture of intermediates. Manufacture of specialty fertilizers.

Uses advised against Reason

Not applicable Non-hazardous substance.

Supplier's details

: Agrium Canada Partnership (A Subsidiary of Nutrien Ltd.)

13131 Lake Fraser Drive, S.E. Calgary, Alberta, Canada, T2J 7E8

Nutrien US LLC (A Subsidiary of Nutrien Ltd.)

5296 Harvest Lake Drive Loveland, CO 80538

Company phone number (North America):1-847-849-4200 (Customer Service)

sds@nutrien.com - www.nutrien.com

Emergency telephone number (with hours of operation) : Nutrien 24 Hr Emergency Telephone Numbers:

From Canada or the U.S, English:

Transportation Emergencies: 1-800-792-8311 Medical Emergencies: 1-303-389-1653

From Canada or the U.S. French or Spanish:

Transportation or Medical Emergencies, call: 1-303-389-1654

From Mexico, Spanish:

Transportation or Medical Emergencies, call: 00-1-303-389-1654

Section 2. Hazard identification

Classification of the substance or mixture : Not classified. This product is not considered hazardous according to the definitions and classification requirements under WHMIS 2015 (Canada), HAZCOM 2012 (United States), and NORMA OFICIAL MEXICANA 018 (Mexico).

OSHA/HCS status

: While this material is not considered hazardous by the OSHA Hazard Communication Standard (29 CFR 1910.1200), this SDS contains valuable information critical to the safe handling and proper use of the product. This SDS should be retained and available for employees and other users of this product.

GHS label elements

Date of issue/Date of revision : 8/10/2021 Date of previous issue : 6/13/2018 Version : 2.6 1/12

🔀 ulfate Plus, Granular, 20-0-0 Ammonium Sulfate

Section 2. Hazard identification

Hazard pictograms : Not Applicable.

No Aplicable. Non applicable.

Signal word : No signal word.

Hazard statements : Not applicable.

Precautionary statements

General : Read label before use. Keep out of reach of children. If medical advice is needed,

have product container or label at hand.

Prevention : Not applicable.
Response : Not applicable.
Storage : Not applicable.
Disposal : Not applicable.
Supplemental label : None known.

Other hazards which do not

result in classification

elements

: Handling and/or processing of this material may generate a dust which can cause

mechanical irritation of the eyes, skin, nose and throat.

Section 3. Composition/information on ingredients

Substance/mixture : Substance

Ingredient name	% (w/w)	CAS number
Ammonium sulfate Ammonium hydrogensulfate	> 97 1 - 1.5	7783-20-2 7803-63-6

Any concentration shown as a range is to protect confidentiality or is due to batch variation.

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment and hence require reporting in this section.

Occupational exposure limits, if available, are listed in Section 8.

Section 4. First-aid measures

Description of necessary first aid measures

Eye contact: Immediately flush eyes with plenty of water, occasionally lifting the upper and lower

eyelids. Check for and remove any contact lenses. Get medical attention if irritation

occurs.

Inhalation : Remove person to fresh air. No known significant effects. Seek medical attention

for any signs of wheezing and/or breathing difficulties. For additional advice call the medical emergency number on this SDS or your poison center or medical provider.

Skin contact: No known significant effects. Rinse the affected areas with water. Remove

contaminated clothing, jewelry, and shoes. Wash/clean items before reuse. Seek medical attention for persistent skin pain or irritation. For additional advice call the

medical emergency number on this SDS or your poison center or doctor.

Ingestion: Wash out mouth with water. Remove dentures if any. If material has been

swallowed and the exposed person is conscious, give small quantities of water to drink. Stop if the exposed person feels sick as vomiting may be dangerous. Do not induce vomiting unless directed to do so by medical personnel. If vomiting occurs, the head should be kept low so that vomit does not enter the lungs. Get medical attention if adverse health effects persist or are severe. Never give anything by

mouth to an unconscious person.

Most important symptoms/effects, acute and delayed Potential acute health effects

Date of issue/Date of revision : 8/10/2021 Date of previous issue : 6/13/2018 Version : 2.6 2/12

Section 4. First-aid measures

Eye contact: No known significant effects or critical hazards. May cause irritation due to

mechanical action.

Inhalation : No known significant effects or critical hazards.
 Skin contact : No known significant effects or critical hazards.
 Ingestion : No known significant effects or critical hazards.

Over-exposure signs/symptoms

Eye contact: No specific data. May cause irritation due to mechanical action.

Inhalation: No specific data.Skin contact: No specific data.Ingestion: No specific data.

Indication of immediate medical attention and special treatment needed, if necessary

Notes to physician : Treat symptomatically. Contact poison treatment specialist immediately if large

quantities have been ingested or inhaled. In case of inhalation of decomposition products in a fire, symptoms may be delayed. The exposed person may need to be kept under medical surveillance for 48 hours. Contact Nutrien's 24 Hr Medical Emergency telephone number for professional support: English: 1-303-389-1653;

French or Spanish: 1-303-389-1654

Specific treatments: No specific treatment. Treat symptomatically.

Protection of first-aiders : No action shall be taken involving any personal risk or without suitable training.

Mouth-to-mouth resuscitation of oral exposure patients is not recommended. First-

aiders with contaminated clothing should be properly decontaminated.

See toxicological information (Section 11)

Section 5. Fire-fighting measures

Extinguishing media

Suitable extinguishing media

: The substance will not burn. Undergoes thermal decomposition at elevated temperatures to release toxic and/or flammable gases. Use an extinguishing agent suitable for the surrounding fire.

Unsuitable extinguishing media

: None known.

Specific hazards arising from the chemical

Hazardous thermal decomposition products

: No specific fire or explosion hazard.

 Decomposition products may include the following materials: nitrogen oxides sulfur oxides

Special protective actions for fire-fighters

: Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training.

Special protective equipment for fire-fighters

: Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.

Remark

: This material is not explosive. If mixed with chlorine or hypochlorites, it may form nitrogen trichloride which may explode spontaneously in air. Contain and collect the water used to fight the fire for later treatment and disposal.

Date of issue/Date of revision : 8/10/2021 Date of previous issue : 6/13/2018 Version : 2.6 3/12

Section 6. Accidental release measures

Personal precautions, protective equipment and emergency procedures

For non-emergency personnel

: No action shall be taken involving any personal risk or without suitable training. Keep unnecessary and unprotected personnel from entering. Put on appropriate personal protective equipment.

For emergency responders: If specialized clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel".

Environmental precautions

: Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused adverse impacts (sewers, waterways, soil or air).

Methods and materials for containment and cleaning up

Small spill

: Move containers from spill area. Use appropriate equipment to put the spilled substance in a container for reuse or disposal. Dispose of via a licensed waste disposal contractor.

Large spill

: Move containers from spill area. Prevent entry into sewers, water courses, basements or confined areas. Use appropriate equipment to put the spilled substance in a container for reuse or disposal. Recycle to process, if possible.

Dispose of via a licensed waste disposal contractor. Note: see Section 1 for emergency contact information and Section 13 for waste disposal.

Section 7. Handling and storage

Precautions for safe handling

Protective measures

Advice on general occupational hygiene

- : Put on appropriate personal protective equipment (see Section 8).
- : Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Do not ingest. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.

including any incompatibilities

Conditions for safe storage, : Store in accordance with local regulations. May form steep piles that can collapse without warning when stored in bulk. Avoid forming steep slopes when removing product. Ensure that bulk bags or smaller packaged products stored in tiers are stacked, racked, blocked, interlocked, or otherwise secured to prevent sliding, rolling, or collapse. Use caution when opening truck or railcar doors as product may have shifted during transport.

> Must be stored in a dry location. Absorbs moisture on long-term storage under high humidity conditions. Store away from incompatible materials (see Section 10). When product is stored in sealable containers, keep container tightly closed and sealed until ready for use. Sealable containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabeled containers. Use appropriate containment to avoid environmental contamination.

Section 8. Exposure controls/personal protection

Control parameters

Occupational exposure limits

Date of issue/Date of revision : 8/10/2021 Date of previous issue : 6/13/2018 Version :26 4/12

Section 8. Exposure controls/personal protection

Ingredient name	Exposure limits
Canadian Regulations:	
Ammonium sulfate	CA Alberta Provincial (Canada).
	TWA: 10 mg/m³, (Total dust) 8 hours.
	CA Quebec Provincial (Canada).
	TWA: 10 mg/m³, (Total dust) 8 hours.
U.S. Federal Regulations:	
Ammonium sulfate	OSHA PEL (United States).
	Particulates not otherwise regulated (PNOR):
	TWA: 15 mg/m³, (Total dust) 8 hours.
	STEL: 5 mg/m³, (Respirable dust) 8 hours.

Appropriate engineering controls

: Good general ventilation should be sufficient to control worker exposure to airborne contaminants.

Environmental exposure controls

: Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements of environmental protection legislation. In some cases, fume scrubbers, filters or engineering modifications to the process equipment will be necessary to reduce emissions to acceptable levels.

Individual protection measures

Hygiene measures : Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period. Wash

contaminated clothing before reusing.

Eye/face protection : Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists,

gases or dusts. If contact is possible, the following protection should be worn, unless the assessment indicates a higher degree of protection: sealed eyewear

Skin protection

Hand protection : The personal protective equipment required varies, depending upon your risk assessment. Chemical-resistant, impervious gloves complying with an approved

standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary. No special measures are typically indicated

Body protection assessment indicates this is necessary. No special measures are typically indicated.

Personal protective equipment for the body should be selected based on the task

being performed and the risks involved and should be approved by a specialist before handling this product. Cotton or cotton/synthetic overalls or coveralls are

normally suitable.

Other skin protection : Appropriate footwear and any additional skin protection measures should be

selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product. No special measures are

typically indicated.

Respiratory protection: Based on the hazard and potential for exposure, select a respirator that meets the appropriate standard or certification. Respirators must be used according to a

respiratory protection program to ensure proper fitting, training, and other important aspects of use. For U.S. work sites where respiratory protection is required, ensure that a respiratory protection program meeting 29 CFR 1910.134 requirements is in

place. No personal respiratory protective equipment is normally required.

Section 9. Physical and chemical properties

Appearance

Physical state : Granular solid.

Color : White.

Odor : Odorless.

Odor threshold : Not applicable

PH : 4.2 [Conc. (% w/w): 1.6%]

Melting point : Decomposition temperature: 235.01°C (455°F)

Date of issue/Date of revision : 8/10/2021 Date of previous issue : 6/13/2018 Version : 2.6 5/12

Sulfate Plus, Granular, 20-0-0 Ammonium Sulfate

Section 9. Physical and chemical properties

Boiling point : Not available.

Flash point : [Product does not sustain combustion.]

Evaporation rate : Not applicable.
Flammability (solid, gas) : Not applicable.
Lower and upper explosive : Not available.

(flammable) limits

Vapor pressure: Not available.Vapor density: Not applicable

Relative density : 0.976

Solubility : Easily soluble in the following materials: cold water and hot water.

Solubility in water : 767 g/l Partition coefficient: n- : -5.1

octanol/water

Auto-ignition temperature : Not applicable.

Decomposition temperature : 235.01°C (455°F)

Viscosity : Not applicable.

Section 10. Stability and reactivity

Reactivity: Incompatible with halogens, hydrogen peroxide, chlorinated hydrocarbons, fluorine,

nitric acid, oxidizing agents and sulfuric acid.

Chemical stability: The product is stable.

Possibility of hazardous reactions

: Under normal conditions of storage and use, hazardous reactions will not occur.

Conditions to avoid : May produce corrosive substances on hydrolysis. Contact your sales representative

or a metallurgical specialist to ensure compatability with your equipment.

Incompatible materials: See above.

Hazardous decomposition products

: Under normal conditions of storage and use, hazardous decomposition products

should not be produced.

Section 11. Toxicological information

Information on toxicological effects

Acute toxicity

Product/ingredient name	Result	Species	Dose	Exposure
Ammonium sulfate	LD50 Oral	Mouse - Male, Female	3040 mg/kg	-
	LD50 Oral LD50 Oral	Rat Rat - Male, Female	2840 mg/kg >2000 mg/kg	-
	LD50 Oral	Rat	4540 mg/kg	-

Conclusion/Summary

: Very low toxicity to humans or animals.

Irritation/Corrosion

Product/ingredient name	Result	Species	Score	Exposure	Observation
Ammonium sulfate	Skin Eyes	Rabbit Rabbit	0 0		24 hours 72 hours

Conclusion/Summary

Date of issue/Date of revision : 8/10/2021	Date of previous issue	: 6/13/2018	Version : 2.6 6/12
--	------------------------	-------------	---------------------------

Section 11. Toxicological information

Skin
 No known significant effects or critical hazards.
 Eyes
 No known significant effects or critical hazards.
 Respiratory
 No known significant effects or critical hazards.

Sensitization

3	Route of exposure	Species	Result
Ammonium sulfate	Skin	Guinea pig	Not sensitizing

Conclusion/Summary

Skin : No known significant effects or critical hazards.Respiratory : No known significant effects or critical hazards.

Mutagenicity

Product/ingredient name	Test	Experiment	Result
Ammonium sulfate	OECD 476	Experiment: In vitro Subject: Mammalian-Animal Cell: Somatic	Negative
	OECD 473	Experiment: In vitro Subject: Mammalian-Animal Cell: Germ	Negative

Conclusion/Summary

: No known significant effects or critical hazards.

Carcinogenicity

Product/ingredient name	Result	Species	Dose	Exposure
Ammonium sulfate	Negative - Oral - TCLo	Rat - Male, Female	1288 mg/kg	2 years; 7 days per week

Conclusion/Summary

: No known significant effects or critical hazards.

Reproductive toxicity

Product/ingredient name	Maternal toxicity	Fertility	Development toxin	Species	Dose	Exposure
Ammonium sulfate	Negative	Negative	-		Oral: 5000 mg/ kg	-

Conclusion/Summary

: No known significant effects or critical hazards.

Teratogenicity

Product/ingredient name	Result	Species	Dose	Exposure
Ammonium sulfate	Negative - Oral	Rat - Male, Female	1500 mg/kg	-

Conclusion/Summary : No know

: No known significant effects or critical hazards.

<u>Specific target organ toxicity (single exposure)</u>

Not available.

Specific target organ toxicity (repeated exposure)

Not available.

Aspiration hazard

Not available.

Information on the likely routes of exposure

: Routes of entry anticipated: , Inhalation. Routes of entry not anticipated: Dermal.

Potential acute health effects

Date of issue/Date of revision : 8/10/2021 Date of previous issue : 6/13/2018 Version : 2.6 7/12

🔀 ulfate Plus, Granular, 20-0-0 Ammonium Sulfate

Section 11. Toxicological information

Eye contact: No known significant effects or critical hazards. May cause irritation due to

mechanical action.

Inhalation
 Skin contact
 No known significant effects or critical hazards.
 Ingestion
 No known significant effects or critical hazards.
 No known significant effects or critical hazards.

Symptoms related to the physical, chemical and toxicological characteristics

Eye contact: No specific data. May cause irritation due to mechanical action.

Inhalation: No specific data.Skin contact: No specific data.Ingestion: No specific data.

Delayed and immediate effects and also chronic effects from short and long term exposure

Short term exposure

Potential immediate: May cause irritation due to mechanical action.

effects

Potential delayed effects: No known significant effects or critical hazards.

Long term exposure

Potential immediate : No known significant effects or critical hazards.

effects

Potential delayed effects: No known significant effects or critical hazards.

Potential chronic health effects

Conclusion/Summary: Very low toxicity to humans or animals.

General : No known significant effects or critical hazards.
 Carcinogenicity : No known significant effects or critical hazards.
 Mutagenicity : No known significant effects or critical hazards.
 Teratogenicity : No known significant effects or critical hazards.
 Developmental effects : No known significant effects or critical hazards.
 Fertility effects : No known significant effects or critical hazards.

Section 12. Ecological information

Toxicity

Product/ingredient name	Result	Species	Exposure
Ammonium sulfate	Acute LC50 2.6 mg/l Fresh water	Crustaceans - Ceriodaphnia dubia - Young	48 hours
	Acute LC50 14000 μg/l Fresh water	Daphnia - Daphnia magna - Young	48 hours
	Acute LC50 53 mg/l Chronic NOEC 143 µg/l Marine water	Fish - Oncorhynchus mykis Fish - Salmo salar - Post-smolt	96 hours 5 weeks

Conclusion/Summary: Very low acute toxicity to fish. No known significant effects or critical hazards.

Persistence and degradability

Conclusion/Summary : Not applicable

Product/ingredient name	Aquatic half-life	Photolysis	Biodegradability
Ammonium sulfate	-	-	Readily

Bioaccumulative potential

Date of issue/Date of revision	: 8/10/2021	Date of previous issue	: 6/13/2018	Version : 2.6	8/12

Other adverse effects

: No known significant effects or critical hazards.

Section 13. Disposal considerations

Disposal methods

The generation of waste should be avoided or minimized wherever possible. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and nonrecyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction. This material and its container must be disposed of in a safe way. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible. Empty containers or liners may retain some product residues. Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers.

Section 14. Transport information

	TDG Classification	DOT Classification	Mexico Classification	IMDG	IATA
